

Team Project Peer Review Form
To be completed separately for each of the three parts of Project #2!

Name of Evaluator Zach Thompson

Each team member should completely fill in a peer review form. Evaluate **all team members including yourself**, then normalize each rating using the formula given.

You may use any criteria you feel is appropriate to judge individuals in your team, but the final score should be an honest, objective assessment of each person's overall contribution to the project. Suggested criteria include:

- Quality and completeness of work (technical skill, correctness, accuracy)
- Leadership (Ideas, organizational skills, initiative)
- Team Interaction (Enthusiasm, availability, attitude, working with others)
- Overall effort

A peer review worksheet based on these criteria is included to assist you in evaluation.

The normalized scores will be averaged across each team and used as multipliers to the team's project grade to determine individual grades.
